

PONI Energy Saving (保利節能)

PONI REFLECTOR (反光板)

Model No. PONI - **PNR 812 / PNR 806 / PNR 612 / PNR 606 / PNR512 / PNR 506**

Material: Nano refelctor + ABS board

Size: 60CM / 90CM / 120CM / 150CM

Product Differentia:

1. PONI Nano reflector can improve the problems of traditional oxidation deterioration and gray-off, the company's nanotechnology researched and developed on its own, to deal with the questions of manufacture and to improve the curvature, it can significantly enhance the effective lighting area, and through the upgrading of light, the light effect will be more bright with one tube instead of two

2. Easy installation, gain brightness without additional cost and save more energy Increase brighter and thus reduce the need for more lightings save money for lamp tray in which is needed for more lightings-Less maintenance costs and faster payback

3. Guarantee: 3 years

4. Certificate: SGS

5. Utility model patent No. : ZL 2009 20050060.9

S.P. Reference:

(No. 1 - 6)
